

CalFresh Outreach Basics

Developing County Partnerships

Establishing county partnerships is essential to best serve students in meeting their basic needs, especially under CalFresh.

[Assembly Bill 1326](#) was established to strengthen relationships between public higher education campuses and county welfare departments by designating at least 1 to 2 campus staff (CalFresh Outreach Coordinator, Basic Needs Manager, etc.) who can serve as a point of contact for county staff and vice versa.

Your campus can submit a campus liaison through the [CFO Resource Hub Support Desk](#).

For campuses who have not established a county partnership and wish to reach out to your county liaison to begin forming those partnerships, you may use the [county contact list](#).

For additional information and best practices, please visit the Resource Hub page under [Campus & County Partnerships](#).
